1. Using the Installer

1.1. Ubuntu

Step 1 — Add the repository and update package lists:

```
sudo curl https://git.sleepat.fit/api/packages/SobekCo/debian/
   repository.key \
  -o /etc/apt/keyrings/forgejo-SobekCo.asc

echo "deb [signed-by=/etc/apt/keyrings/forgejo-SobekCo.asc] \
  https://git.sleepat.fit/api/packages/SobekCo/debian stable main" \
  | sudo tee -a /etc/apt/sources.list.d/forgejo.list

sudo apt update
```

Step 2 — Install the package:

```
sudo apt install sobkulacka=0.0.1-89-gcddce8b
```

1.2. Arch Linux

Step 1 — Add the trust certificate to pacman:

```
wget -O sign.gpg \
  https://git.sleepat.fit/api/packages/SobekCo/arch/repository.key

pacman-key --add sign.gpg

pacman-key --lsign-key 'SobekCo@noreply.git.sleepat.fit'
```

Step 2 — Add the repository to `/etc/pacman.conf`:

```
[sobekco.git.sleepat.fit]
SigLevel = Required
Server = https://git.sleepat.fit/api/packages/SobekCo/arch/extra/
   $arch
```

Step 3 — Sync and install the package:

```
pacman -Sy sobkulacka
```

2. Building Manually

Download the repository and unpack it. Then navigate to the folder where you unpacked it and run the following commands:

```
make deps
make all
```

Note: This application is made for Linux distributions only. It will not work on other operating systems.

3. Usage

Sobkulacka provides two operational modes to suit different user needs: **simple** and **advanced**.

3.1. Simple Mode

Simple mode is designed for everyday calculations and supports the following basic arithmetic operations:

- Addition (`+`)
- Subtraction (`-`)
- Multiplication (`*`)
- Division (`/`)

3.2. Advanced Mode

Advanced mode unlocks the full potential of Sobkulačka, offering a comprehensive set of mathematical functions. You can access these features either through the graphical user interface (GUI) or by typing commands directly on your keyboard.

3.2.1 Supported Functions

- Trigonometric functions: `sin`, `cos`, `tg`, `cotg`
- Roots: `root`
- Factorials: `factorial` (!)
- Modulo operation: `modulo` (%)
- Exponentiation: `power` (^)

4. Uninstallation

To uninstall, run:
On Ubuntu:

```
sudo apt remove sobkulacka
```

On Arch:

```
sudo pacman -R sobkulacka
```
